

Mini Symposium

Date: Monday, January 26th, 2015

Location: T-Building, Large Lecture Hall

14:00-14:50 Carol Mason, Columbia University, Department of Pathology and Cell Biology, New York

"Wiring eye to brain for binocular vision"

14:50-15:40 Steve Wilson, University College London, Department of Cell and Developmental Biology, London

"Breaking symmetry in the brain: from genes to circuits"

Coffee break

16:00-16:50 Tony Movshon, New York University, Center for Neural Science, New York

"Cortical analysis of visual form"

16:50-17:40 Nathaniel Heintz, Rockefeller University, Laboratory of Molecular Biology, New York

"Understanding Brain Function: Insights from Genetic and Epigenetic Analysis of CNS Cell Types"

GUESTS ARE CORDIALLY INVITED
